- [5. margin](#)

1. Property: color

Use Case: Sets the foreground color of text.

Code Example:

```
#color-example {
  color: #2980b9; /* Azul */
}
```

Result:

This text is blue.

More Info: [W3C color](#)

2. Property: background-color

Use Case: Sets the background color of an element.

```
#bg-color-example {
  background-color: #f1c40f; /* Amarillo */
}
```

Result:

This element has a yellow background.

More Info: [W3C background-color](#)

3. Property: font-size

Use Case: Sets the size of the font.

```
#font-size-example {
  font-size: 20px;
}
```

Result:

This text is 20 pixels large.

More Info: [W3C font-size](#)

4. Property: border

Use Case: Sets the thickness, style, and color of an element's border.

```
#border-example {
  border: 2px solid #e74c3c; /* Borde rojo sólido */
}
```

Result:

This element has a solid red border.

More Info: [W3C border](#)

5. Property: margin

Use Case: Creates space around elements, outside of any defined borders.

```
#margin-example {
  margin-left: 50px; /* Margen izquierdo */
}
```

Result:

This element has a 50px margin on the left.

More Info: [W3C margin](#)
